International collaboration is crucial to addressing energy challenges. ADIPEC serves as an ideal platform to take the collective decarbonisation drive to the next level, and we are happy to share our experience with other countries. Having one of the fastest-growing clean energy industries in the world, the UAE is set to generate a total capacity of 19.8 gigawatts of clean energy by 2030.

His Excellency Suhail Mohamed Faraj Al Mazrouei Minister of Energy and Infrastructure United Arab Emirates

Join the world's largest energy event

ADIPEC 2024 will explore the power of energy in accelerating an economy-wide transformation that delivers for people, the planet and our collective prosperity.

Hosted by ADNOC, ADIPEC builds on its 40-year legacy, creating a unified, inclusive platform for the entire energy ecosystem, convening communities, nations, and industries, the world's largest energy producers and consumers, as well as enablers in government, finance and technology to find collective solutions towards affordable, secure, and sustainable energy for all.

The event takes place ahead of COP29, presenting a crucial opportunity for the energy industry to demonstrate collaborative progress on climate action commitments made and targets set as part of the UAE Consensus at COP28.

Across more than 350 conference sessions featuring over 1,600 diverse voices, and across its 16 exhibition halls, ADIPEC will advance tangible action and build the critical cross-sector partnerships needed to mobilise finance and investment, fast-track innovation and accelerate technology adoption, and advance the decarbonisation of heavy industries.

Unlock real business value through global partnerships

Creating a world-class environment for trade across the energy industry's full value chain, ADIPEC generates the highest value and measurable returns on investment for energy businesses and professionals worldwide.

As the world's largest energy conference and exhibition, ADIPEC serves as a nexus, seamlessly uniting international, regional, and local stakeholders, from across industries including energy, technology and finance.

Within this vibrant ecosystem, businesses have the unique opportunity to forge strategic global partnerships critical to pioneering new business models, sustainable best practices and innovative solutions that are advancing the transition, transforming the energy system and accelerating climate action.

Knowledge exchange

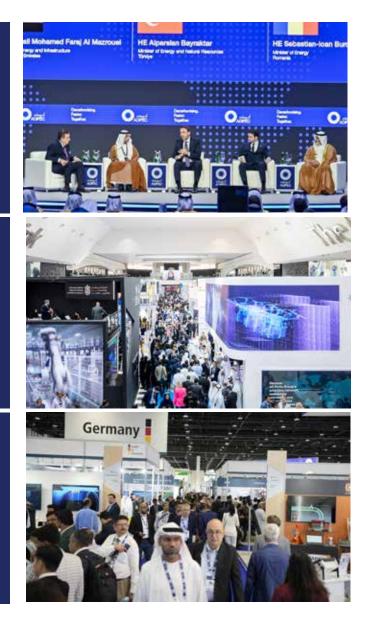

More than 1,600 ministers, CEOs, policymakers, innovators, academics and energy experts will share their unique insights across 350+ conference sessions. Attendees will delve into a wealth of high level thought leadership, gaining unparalleled access to groundbreaking solutions, insightful best practices and new strategies essential for navigating and shaping the future energy landscape.

Purchasing power

With 95% of attendees comprising decision-makers, purchasers, or influencers, ADIPEC presents a one-of-akind opportunity for participants to convene and unlock millions of dollars in new business ventures.

International perspective

Drawing in over 2,200 exhibitors – including 54 national, international, and integrated energy companies, and featuring 30 country pavilions, ADIPEC is the epicenter for unparalleled insights into the transformative agendas steering innovation, growth and resilience across global energy markets.

Collaboration and knowledge sharing are crucial to the energy transition and ADIPEC is a brilliant platform for doing that. We always welcome the opportunity to share what bp is learning as we grow new lower carbon businesses and work to decarbonise our core oil and gas business.

> أديبك ADIPEC

Together.

Murray Auchincloss Interim CEO bp

A platform for engagement between leading NOCs, IOCs, NECs and IECs

ADIPEC welcomes the participation of more than 54 energy companies, offering a platform to showcase the latest innovations, technologies and solutions driving energy progress. Participants include:

ADIPEC has evolved from an oil and gas event to a meeting of energy companies, consumers and companies with clean energy technologies. It is becoming a holistic platform for us to have a voice to raise awareness, talk about tangible solutions and define the pathways against which we will address climate change issues.

,,

Proscovia Nabbanja CEO UNOC

A platform for international collaboration

ADIPEC ensures representation from around the world, enabling a deeper understanding of the unique and complex energy and climate challenges faced by communities across the world.

The 30 dedicated country pavilions at ADIPEC will amplify diverse perspectives, spotlight innovative ideas and sustainable practices, provide a platform to forge game-changing global partnerships, and encourage unity around the common goal of delivering a fair and equitable transition.

Country pavilions

ADIPEC is one of the world's most influential meeting places where energy players and professionals come together to discuss all the main topics in the energy sector.

"

Claudio Descalzi CEO Eni

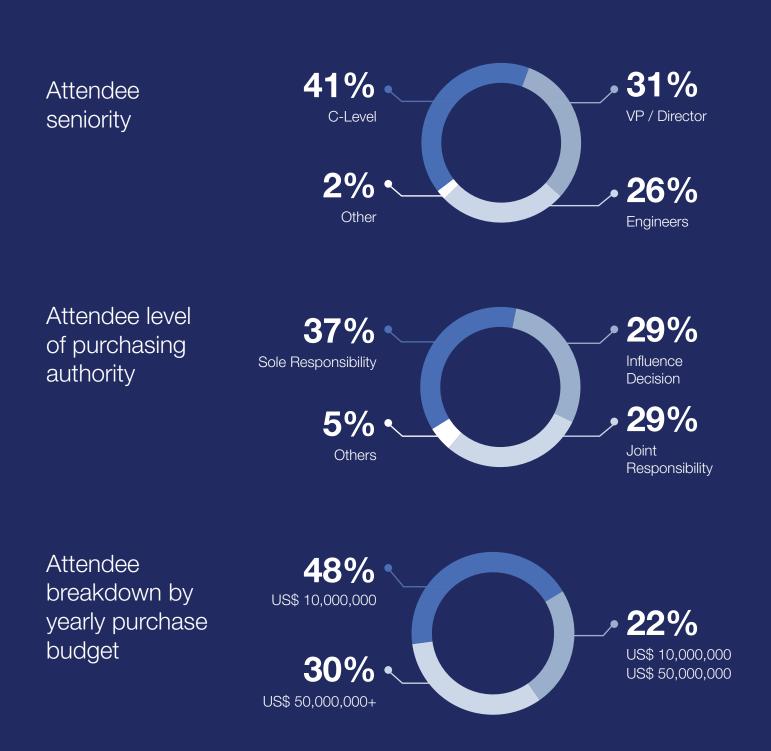

A truly global platform

ADIPEC convenes more than 184,000 attendees from every corner of the world, empowering collective action, sparking innovation and driving partnerships needed to fast-track the energy transition.

Attendee breakdown by region

Middle East	39%
Asia	22 %
Europe	18%
America	11%
Africa	10%

Exhibition

Decarbonisation

To advance the world's decarbonisation goals, businesses, political decision makers and innovative thinkers will need to come together to mobilise their collective knowledge, expertise and the resources needed to move from consensus to action on emissions reduction.

The Decarbonisation Accelerator can spark the disruptive thinking needed to deliver tangible, high-impact solutions for energy sustainability and decarbonisation, bridging the gap between finance and innovation to unlock unprecedented new investments in our collective energy future.

By spotlighting transformational energy solutions, from opportunities in new energy adoption, storage, carbon capture, infrastructure and utilities, to the decarbonisation of heavy industries and advances in methane emissions reduction, the accelerator provides a platform for businesses working to tackle these critical challenges with new pathways to scale and grow.

Showcase your energy decarbonisation technologies at ADIPEC.

Visit <u>www.adipec.com/decarbonisation-at-adipec</u> or contact the team at <u>sales@adipec.com</u> to learn more.

ADIPEC stands as a key platform for thought leadership and collaboration within the energy industry. By fostering an environment of partnership, learning, and growth, ADIPEC is driving meaningful progress today and will continue to play a central role in our shared goal of decarbonizing faster together.

"

Olivier Le Peuch CEO SLB

Exhibition

Digitalisation

Digital technologies will form the foundations of an energy system that can enable a highergrowth, lower-carbon future. The Digitalisation Zone will advocate for the accelerated adoption and integration of transformational digital solutions like smart grids, drone and satellite detection technologies, and shared mobility solutions.

By creating a space to share new ideas, solutions and best practices, the Digitalisation Zone seeks to demonstrate how industry leaders and innovators can come together to create the energy system of the future, today.

Highlight your digital solutions in the energy sector at ADIPEC.

Visit <u>www.adipec.com/digitalisation-in-energy</u> or email <u>sales@adipec.com</u> for details.

The energy industry was united once again at ADIPEC, to further enable collaboration, to accelerate action and to deliver outcomes as we drive forward solutions to help meet sustainability targets.

"

Antonio Pietri President and CEO Aspen Technology

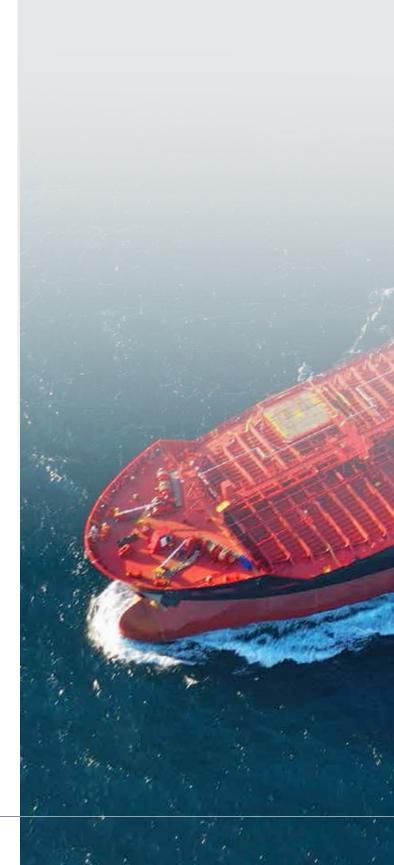

Exhibition

Maritime & Logistics

Moving from consensus to action on the challenge of decarbonising the global maritime and logistics industries at scale requires continued progress in the development and roll-out of supportive policies and cross-sector strategies.

The Maritime & Logistics Zone is a meeting place for the energy and maritime sectors to come together to explore emissions reduction solutions that can advance the world's climate ambitions. It will bring together industry leaders, regulators and decision makers from the global maritime and logistics supply chain, alongside leading technological and digital experts to accelerate tangible, collective progress and advance the unprecedented commitments set out in the UAE Consensus.

Present your innovations and solutions at the leading maritime and logistics exhibition. Visit www.adipec.com/decarbonisation-at-adipec or contact the team at sales@adipec.com to learn more.

ADIPEC is growing every year, it is becoming better every year. This year it is noticeable how many people are onboard, how busy it is, how many partners there are. Networking was huge and we're all talking about one topic, which is decarbonisation, renewable and green energy.

ADIPEC conference programmes

The ADIPEC Conferences seek to advance tangible action and demonstrate collaborative industry progress, emphasising the need for an economy-wide transformation for people, planet, and our collective prosperity. The conference program aims to catalyse this shift by connecting the ideas, ambition, technology, and capital necessary to foster innovative solutions and drive actionable outcomes.

Spanning over 10 conferences and 350 sessions, ADIPEC will provide an inclusive stage for more than 1,600 speakers to address the most urgent global energy challenges. These leaders and innovators will offer diverse perspectives and approaches, sharing impactful insights from across the energy, finance, technology, manufacturing, transport and construction sectors.

Welcoming more than 16,500 delegates, the conferences will encourage cross-sector collaboration and explore pivotal strategies and innovations essential to accelerating the transition to a cleaner, more secure energy future.

Strategic

COP28 marked the first Global Stocktake. It also inspired countries and all stakeholders to accelerate the pace of tackling climate change and put inclusivity center stage, while pledging to triple renewable energy capacity to at least 11,000 GW and double the global average annual rate of energy efficiency improvements from around 2% to more than 4% every year until 2030.

Taking place ahead of COP29, ADIPEC 2024 will facilitate a meeting of minds across diverse sectors and geographies, forging the alliances and collaborations necessary to accelerate the transition away from fossil fuels, in a multi-decade re-engineering of the global energy system.

Driving momentum on commitments and actions, the Strategic Conference will harvest insights on the latest thinking, trends and solutions around emissions, energy efficiencies and disruptive technology from those at the forefront of delivering the strategies, business models and technology innovations. Diverse perspectives and insights will strengthen companies' resilience and ability to deliver enhanced shareholder value, while meeting their climate responsibilities.

Hear from global policymakers and industry leaders at the Strategic Conference.

Hydrogen

Integrating clean hydrogen solutions at scale will have a transformational impact on the global energy transition, playing a critical role in decarbonising hard-to-abate sectors.

Production tax credits and renewable mandates are paving the way to project viability but regulatory uncertainties and inflationary impacts highlight the urgent need for cost reductions through technological advances. Meanwhile, the substantial increase in electrolyser capacity reflects global progress in infrastructure development, catalysing the development of a global hydrogen economy.

To stimulate hydrogen demand, securing offtake agreements within the private sector, coupled with international cooperation and policy support, will be essential. As the energy landscape evolves, hydrogen is anticipated to become an integral part of a net-zero future, with international trade being pivotal. Initiatives such as the UAE Hydrogen Declaration of Intent, established at COP28, are monumental in enabling certification standards to unlock global trade in low-carbon hydrogen.

The Hydrogen Conference will convene industry leaders to discuss these developments and chart a path forward. The conference will focus on hydrogen's integration into global economies, address technological innovations, and support the development of strategies to scale up the hydrogen economy and accelerate the energy transition.

ADN

ADIPEC 2023 helped frame the challenges and opportunities for the development of the clean hydrogen markets, and highlighted the vital role that hydrogen derivatives like ammonia and methanol play in the global decarbonisation journey. Its sustainability focused agenda is exactly what the global energy market needs at events like this to align efforts and help accelerate the action required to meet emissions targets.

Ahmed El-Hoshy CEO Fertiglobe and OCI Global "

Conferences

Finance & Investment NEW

There is an evident disparity between capital flows and the necessary investment for a fair, systematic and equitable transition, with US\$35 trillion projected to be required for investment in the energy sector by 2030 to facilitate a successful transformation.

While progress is being made, as laid out in the UAE Consensus, many financers and energy companies are encountering issues around the availability, accessibility and affordability of the capital needed to transform energy systems. Overcoming the issues of large scale clean energy project bankability, navigating turbulent and unpredictable macro-economic headwinds, and unlocking the green potential of developing economies are some of the challenges facing energy and financial sectors today. ADIPEC will unleash the power of energy as a driver of advancement and prosperity, exploring how the industries can transform these transition opportunities and risks into tangible returns.

Across 3 days, the Finance & Investment Conference will offer a convening platform for the finance and energy sectors to activate finance and investment like never before. The conference will spotlight the unique challenges and opportunities in the creation of transformational energy solutions needed to fast-track the global energy transition.

Connect with finance and investment leaders at the Finance and Investment Conference.

Conferences

Decarbonisation

ADIPEC seeks to address an era-defining challenge: balancing the need for equitable global economic development and prosperity with the urgent need to cut global GHG emissions.

Achieving decarbonisation requires a comprehensive, global approach that addresses energy production and consumption across diverse sectors such as buildings, transportation, industry and power systems.

The UAE Consensus drives countries to accelerate decarbonisation by transitioning away from fossil fuels, tripling their renewable capacity and doubling energy efficiency by 2030. Leading countries in decarbonisation have made significant progress by decreasing energy intensity, shifting to electricity from fossil fuels and adopting zero-carbon technologies for electricity generation.

The Decarbonisation Conference will offer an inclusive forum dedicated to finding credible solutions that can deliver the energy system of the future, while rapidly decarbonising the energy systems of today. Sessions will also explore innovation, international collaboration and digitalisation as key enablers of progress, accelerated through robust policies and the adoption of high-impact technologies.

The conference will tackle topics including the transition to renewable energy sources, enhancing energy efficiency across sectors, implementing carbon pricing mechanisms, investing in carbon capture technologies, and optimising, electrifying, and decarbonising energy systems.

Engage in shaping a decarbonised future with energy leaders at the Decarbonisation Strategic Conference.

Learn more at <u>www.adipec.com/conferences</u> Book your pass by emailing <u>delegate@adipec.com</u> or visiting <u>www.adipec.com/delreg</u>

We have seen ADIPEC grow, which has been an amazing experience, and the focus of dialogue has shifted to decarbonisation, which is crucially important.

Steve Kelly President 1PointFive International

Conferences

Digitalisation & Technology NEW

The rapid growth of next generation technologies such as AI, IoT, and blockchain, have the potential to accelerate the energy transition and mitigate climate change at the pace needed to meet ambitious climate targets. From renewable energy supply and demand forecasting, the optimisation of energy assets, and the modelling of transition pathways these technologies are already advancing progress and driving measurable improvements. To realise the full potential of these 4IR technologies global collaboration will be required to create new materials, develop nurturing policy, and funding mechanisms that will drive innovation and support the interoperability of connected systems and data sharing at an unprecedented scale.

Enabling a secure supply of critical raw materials and identifying new opportunities for resource sharing across global value chains will be crucial in ensuring the scale up of critical climate technologies. Beyond this, next generation technologies have the capability to transform the security and sustainability of food systems and unlock new opportunities in the blue economy. While the possibilities

are far reaching, these technologies will not be a silver bullet to transformation, scaling them requires extensive energy use and carries its own emissions profile, which must be carefully managed to ensure transformative benefit with minimal emissions.

The Digitalisation and Technology Conference will bring together energy and technology pioneers to showcase the latest innovations, AI and digital technologies needed for climate mitigation in the energy transition.

Engage with technology pioneers at the Digitalisation and Technology Conference.

Conferences

Voices of Tomorrow NEW

ADIPEC actively bridges the gap between current and future energy leaders, and between the geographical, cultural, and economic divides between the Global North and South. The Voices of Tomorrow Conference fosters a collaborative environment, prioritising diversity, equity, and inclusion to ensure that voices from across the world can unite around the shared mission of delivering a fair and balanced transition.

The conference will feature four individual streams to tackle the most pertinent agendas supporting the UAE Consensus and the important opportunities for the wider community to work multilaterally on commitments to deliver a just energy transition. Topics include bridging the gap between the global north and the global south, strengthening global alliances through intergovernmental and nongovernmental organisations, ensuring equal representation from underrepresented groups, and fortifying the leaders of tomorrow.

Voices of Tomorrow provides a meaningful, convening platform for leaders from the energy industry, representatives from civil society and champions of diversity and youth, ensuring that the path towards a sustainable energy future is shaped by a truly global community.

Hear from the leaders of tomorrow at the Voices of Tomorrow Conference

Conferences

Maritime & Logistics

The International Maritime Organisation's (IMO) revised 2023 strategy sets out a clear target to reduce GHG emissions by 86% by 2040. Shipping operators must align with global netzero ambitions, working together to establish cohesive global approaches to decarbonise the maritime sector.

As the industry confronts the divide between conventional and future fuels, it is imperative for all stakeholders to adopt actionable cross-sector strategies to release bottlenecks and secure offtake agreements. Maritime industry leaders are prioritising ramping up energy efficiency and integrating technologies to lower demand and improve fuel cleanliness.

The readiness of ports for an alternative energy future will be a pivotal part of the maritime decarbonisation journey, balancing the urgency of infrastructure developments with the availability of new fuels. Additionally, the role of shipping in maintaining robust, sustainable global trade, particularly during geopolitical upheavals, will be examined for its agility and resilience.

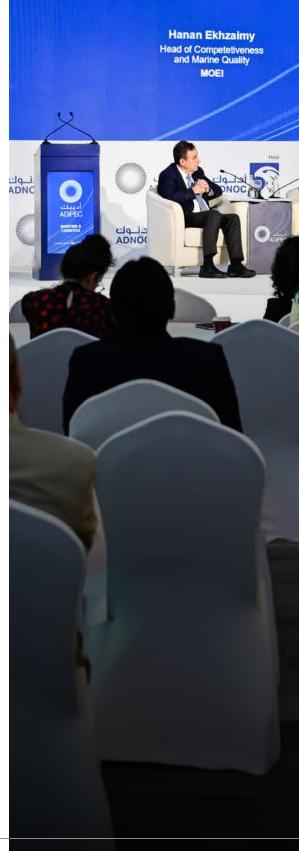

The Maritime & Logistics Conference will shape pragmatic and transparent discussions and foster the cross-industry collaboration needed to find tangible decarbonisation solutions that can accelerate industry-wide transformation, a critical step in delivering a clean energy future while maintaining equitable economic growth.

Middle East Energy Club

Connecting the global energy industry

The Middle East Energy Club connects ministers, dignitaries, C-level executives, and senior decision-makers from across the energy value chain in an exclusive, invitation-only environment.

The club offers a high-level platform for collaboration and innovation, fostering tangible action and the transformative thinking needed to fast-track climate action and catalyse an economy-wide transformation.

The Middle East Energy Club features facilities to network, host meetings, and spark conversations and partnerships in a private setting with world-class amenities and hospitality.

Membership benefits

- Access to the Middle East Energy Club for the duration of ADIPEC
- Opportunity to network with fellow energy industry leaders, innovators, and policymakers
- Opportunity to be invited to the coveted Leadership Roundtables
- Early access to the Leadership Roundtable output reports
- Opportunity to host 1-2-1 meetings in a private setting
- Dedicated ADIPEC and MEEC member registration reception
- Dedicated VIP parking and drop-off zones
- Complimentary food and refreshments
- Complimentary Wi-Fi and VIP concierge services

To enquire about exclusive membership at the MEEC, visit <u>www.adipec.com/meec</u> or contact us us at <u>meec@adipec.com</u>

Leadership Roundtables

Defining the global energy future

In an exclusive and intimate setting, the Leadership Roundtables serve as the cornerstone of ADIPEC, convening the brightest minds and most influential leaders from across the energy ecosystem to drive forward the commitments and ambitions outlined at COP28.

At the heart of the event, these discussions bring together a distinguished group of leaders, policymakers, ministers and innovative thinkers, fostering open, impactful and actionoriented discussions aimed at accelerating the energy transition. Each conversation is enriched by specialised expertise and diverse perspectives, transforming discussions into tangible actions, insights into meaningful impacts, and commitments into reality.

Comprised of an invitation-only cohort of speakers, the roundtables consist of decision-makers who are spearheading the evolution of a responsible energy industry. Their collective efforts facilitate meaningful dialogue and collaboration on pioneering solutions, steering global progress toward a more secure, affordable and sustainable energy future.

Apply to join over 300 international energy leaders in shaping the global energy future.

Visit <u>www.adipec.com/roundtables</u> or email <u>roundtables@adipec.com</u> to learn more.

ADIPEC Awards

Leading the transformation

The ADIPEC Awards recognise the industry's true pioneers, celebrating the fresh perspectives that will be needed to tackle the world's most pressing energy challenges.

This year our awards categories look to celebrate the innovative thinkers and businesses driving action and transformation across industries to deliver tangible solutions for a balanced energy transition, as well as those helping to make the energy systems that support everyday lives and livelihoods more affordable, secure and sustainable for all.

Young ADIPEC

Youth powering the energy future

Under the patronage of His Excellency Sheikh Nahayan Mabarak Al Nahayan, UAE Minister of Tolerance and Coexistence, and with the support of the Abu Dhabi Department of Education and Knowledge (ADEK), ADIPEC 2024 will host the 12th edition of Young ADIPEC.

Held from 4 -7 November at ADIPEC, the world's largest energy exhibition and conference, Young ADIPEC seeks to inspire tomorrow's changemakers, empowering them to work together, unify around a common cause, and play a central role in creating a more inclusive and progressive energy future. It also acts as a dynamic platform for building future youth capacities and expanding the knowledge and creativity of the next generation of energy leaders.

The programme extends its impact by serving as a learning platform that actively engages high school and university students within the framework of Science, Technology, Engineering, and Mathematics (STEM) education.

Since inception in 2013, Young ADIPEC has engaged over 6,000 students from across the UAE, igniting their passion and motivation to prepare them to pursue rewarding careers in the energy industry.

Following last year's success, Young ADIPEC 2024 has expanded to include nine components:

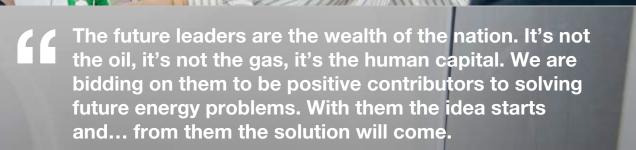

- Industrial Fieldtrips
- Experimental & Edutainment Hub
- Youth Talks
- Ambassadors Connect
- Alumni Connect
- School Connect
- University Connect
- Industry Connect New
- SANED New

To be part of the programme and explore how you can be involved,

ADIPEC Golf Day

Networking on Abu Dhabi's spectacular golfing greens

Held at Abu Dhabi Golf Club, one of the most luxurious golf resort experiences in the Middle East, the ADIPEC Golf Day offers an exclusive opportunity to engage with 125+ key industry players and build collaborative partnerships in a relaxed social atmosphere prior to the official opening day of ADIPEC.

The Abu Dhabi Golf Club's par-72 course is set against a stunning desert landscape, with immaculately maintained fairways and greens that offer a truly unique playing experience. The course features an undulating terrain meandering through pockets of palms, ornamental trees and shrubs with seven spectacular saltwater lakes.

The Golf Day begins with a warm-up before teams of four play the 18- hole championship course and culminates with lunch and the prize distribution ceremony.

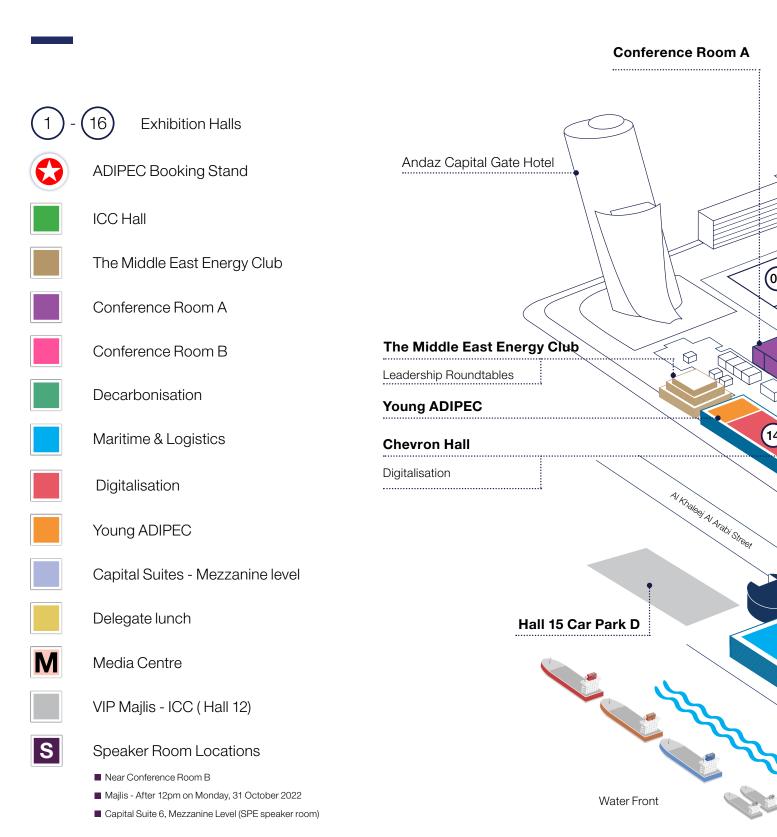

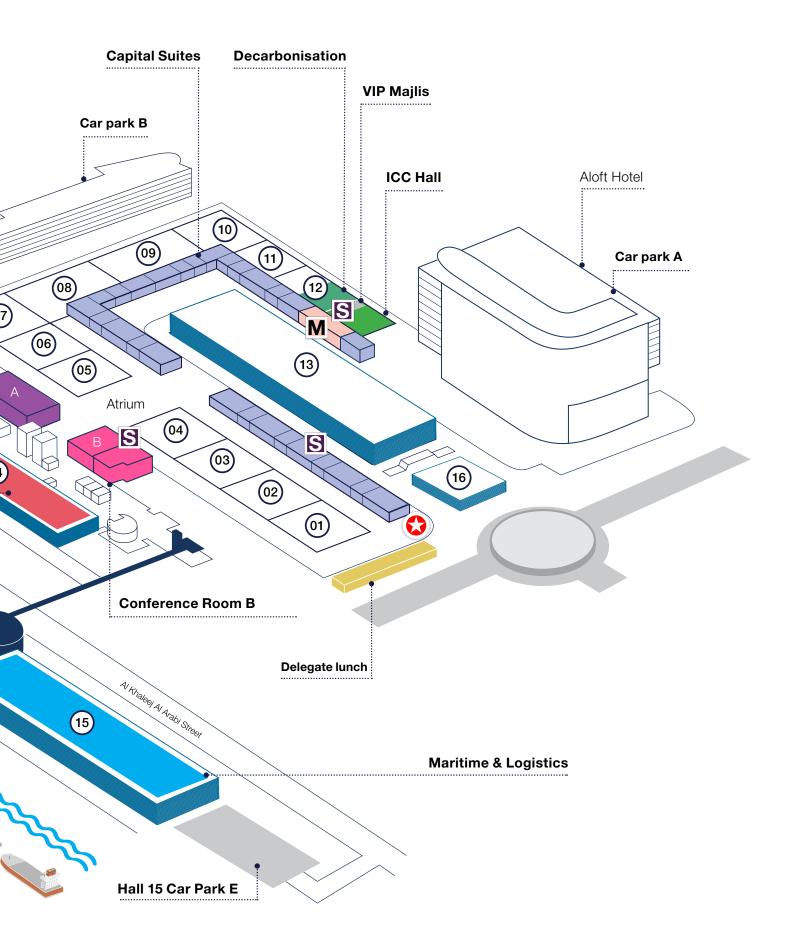

Experience luxury golf and network with key industry players at ADIPEC Golf Day.

Details and registration at <u>www.adipec.com/golf</u> or email <u>golfday@adipec.com.</u>
